Experience

- Program Trainee Analyst (Intern), Cognizant** Apr 2026 – Present
- Training in Reltio, SQL, PL/SQL, Java, and AI basics.
- Full Stack Web Development Intern, BrainzHive** Jun 2025 – Jul 2025
- Assessed and worked on a full stack customer service web application, improving operational efficiency by 30%.
 - Integrated MySQL and deployed on Microsoft Azure, achieving 99% uptime.
- AI/ML Intern, AVNL** Feb 2025 – Mar 2025
- Engineered an object detection model using OpenCV and Python, achieving up to 95% accuracy.
 - Applied Gaussian blur, thresholding, and contour detection for real-time object tracking.

Projects

- ezploy** GitHub
Rust, Java spring boot, Multi-threading, Vue.js, postgresSQL Mar 2026 - April 2026
- Built Ezploy, a PaaS using Java (Spring Boot), Rust, PostgreSQL, Redis, Docker, and Vue.js to automate application deployments from Git repositories.
 - Developed scalable REST APIs and deployment orchestration with JPA/Hibernate, authentication, validation, pagination, containerized builds, and automated Docker-based deployments.
- EatORama** GitHub
Java, swing, MySQL Mar 2026 - April 2026
- Developed a Hotel Management System using Java, Swing, JDBC, and MySQL, implementing 15+ modules for room booking, guest management, billing, and staff operations.
 - Designed 20+ CRUD operations with efficient database integration, input validation, and role-based workflows.
- FlashDB** GitHub
Rust, DB's, Multi-threading Mar 2026 - April 2026
- Designed a concurrent key-value store in Rust supporting 8+ operations (SET, GET, DELETE, UPDATE, FETCH, ROLLBACK, SNAPSHOT) using Arc and Mutex for thread safety.
 - Enabled multi-threaded concurrency (10+ simultaneous operations) and orchestrated snapshot persistence with file rotation (3+ backup states).
- Mini Grep (Rust)** GitHub
Rust Feb 2026 - Mar 2026
- Built a command-line text search tool in Rust with 3+ features including recursive and case-insensitive search.
 - Implemented multi-threaded processing across 1000+ lines using Rust concurrency.
- MiniBrowser** GitHub
Rust Dec 2025 - Jan 2026
- Implemented a lightweight browser engine handling basic HTML parsing and rendering workflows.
 - Designed navigation and request handling logic to simulate core browser functionalities.
- DrawX** GitHub
React.js, Canvas, Node.js, Express, WebSockets April 2025 - May 2025
- Built a collaborative whiteboard supporting 1000+ users using React, Canvas, Node.js, and WebSockets.
 - Achieved 50ms latency and 99.9% reliable real-time communication.
- WanderLust** GitHub
JavaScript, Node.js, Express, Cloudinary APIs June 2024 - July 2024
- Developed a full stack travel platform managing 1000+ destinations using Node.js and Express.
 - Achieved 200ms response time with Mapbox integration and 99% uptime deployment.
- Brainly** GitHub
JavaScript, Node.js, Express, React.js June 2024 - July 2025
- Developed a knowledge-sharing platform enabling users to post, search, and manage queries efficiently.
 - Integrated backend services and database interactions for scalable content handling and retrieval.

Education

- Bachelor of Technology in Computer Engineering** Nov 2022 - May 2026
Pimpri Chinchwad College of Engineering, Pune
- Bachelor of Science in Data Science** Jan 2023 - Present
Indian Institute Of Technology, Madras

Technical Skills

- **Languages:** C, C++, Python, JavaScript, SQL, TypeScript, Rust, Java
- **Frameworks & Libraries:** Next.js, React.js, Node.js, Three.js, Express.js, OpenCV, ws (WebSockets), Spring boot
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis, Spring data JPA
- **Tools & Technologies:** Git, Linux, AWS, Prisma, bash Scripting, awk
- **DevOps:** Docker, Podman
